Technical Skills - Java, C/C++, Python, PHP, TypeScript, HTML, CSS, ReactJS, Bootstrap, Flutter, Vite, Next.js, Node.js, Laravel, CodeIgniter, SQL, MongoDB, Gen AI, Figma, AWS, Google Cloud, Tailwind

Certifications - Google IT Support Professional Certificate, AWS APAC Solutions Architecture Job Simulation, Cloud Computing (IIT Kharagpur), CrowdSource by Google Certificate, Python Certification (Udemy), Generative AI Certification

PROJECTS

ConseptConnect - *(Co-Founder)*
- Co-founded ConseptConnect, a company offering tailored website and app development services with integrated Generative AI features.
- Delivered advanced solutions such as AI-driven chatbots, dynamic user interfaces, and personalized content recommendations to meet diverse client needs.

FitBrainz Website
- Developed a platform tailored for individuals dealing with deep or negative feelings, featuring a structured 30-day program.
- Included personalized health assessments and a directory of medical professionals and hospitals to foster mental and emotional well-being.

BrokerBridge Website
- Created a real estate website enabling users to browse listings, connect with brokers, and schedule viewings.
- Integrated user profiles, property search filters, and secure messaging, enhancing interaction between clients and brokers

UI Clone Projects
- Developed fully coded UI replicas of **Netflix**, **Twitter**, and **Spotify** using **Tailwind CSS**, **Vite**, **TypeScript**, and other modern technologies.
- Focused on creating modern, responsive, and visually appealing designs.
- Implemented dynamic content loading and interactive features to mimic the functionality of the original platforms.

EXPERIENCE

SDE Intern – *Techotd*
- Worked independently on full-cycle project development, gaining hands-on experience in software development and problem-solving.

Virtual Intern – *Google Cloud Generative AI (Smart Bridge)*
- Completed a Generative AI program, applying concepts in practical scenarios with high efficiency.

Web Developer Intern – *BharatIntern*
- Designed and developed web applications, improving user experience and website performance.

Python Developer Intern – *Codxo*
- Focused on programming and automation, enhancing Python proficiency and delivering innovative solutions.

ACHIEVEMENTS

- Cleared **TCS Codevita** Round 1, securing a Top 200 rank out of 10,000.
- Ranked among the Top 500 in **Ericsson's competitive** challenge.
- Achieved Top 5% rank in **Cloud Computing Course by IIT Kharagpur**, earning an Elite + Silver Certificate.
- Successfully completed the 100 Days of Coding Challenge by **GeeksforGeeks**.
- Participated in AI-Conclave 2.0, completed the Introduction to **GANs**, and developed an image generator.

Responsibilities & Contributions
- Independently managed multiple projects during my internship at Techotd, delivering impactful solutions.
- Developed an Automated Excel Converter Bot to streamline workflows and save time.
- Created a Text Extraction and Formatting Bot using Python, automating repetitive tasks for clients.
- Built a Quiz Generator Tool that converts PDFs into quizzes, enhancing productivity for educators.
- Actively contributed articles to the English newspaper of the NSS Club.
- Contributed effectively as a Technical Member in the Linux Club, driving proactive engagement in various initiatives

EXTRA CURRICULARS

Hobbies: Tech enthusiasm - Passionate about exploring and testing emerging technologies, regularly engaging in hands-on experimentation and staying updated with the latest innovative applications and solutions.

Technology Curation - Enthusiastically evaluate the latest gadgets and innovations, staying current with trends and providing insights into their practical applications.
